

Diamond Hearts Foundation, Inc.
At
The Mimi & Tommy Diamond Children's Research Center

Mission Statement:

Mimi and Tommy's dream....

To provide ongoing resources for research, education, development, implementation, training and treatment for mental illness in children. Nearly five million American children and adolescents suffer from a serious mental illness that significantly interferes with their day-to-day life.

The financial resources will come from a percentage of royalties from book sales, merchandising, marketing partners, televisions, empowerment retreats, retail shopping, business opportunities and the annual Auto Rama and lifestyle Expo.

Our Mission...

Diamond Hearts, a planned, innovative research and education foundation, is dedicated to the early detection and treatment of mental illness, primarily in children. Prevention, treatment and risk factor identification; guided by a passionate, well patient philosophy, supplied by a global empowerment and educational foundation of humanitarian philanthropy.

Our Credo...

Curing the mind is not done by drugs alone, but also by the care and compassion a child receives.

Our philosophy of Diamond Hearts has inspired us to develop programs that focus on self-help and personal growth; both emotional and spiritual. It is with this combination of care, treatment, research, development and implementation that Diamond Hearts will be a worldwide leader in the fight against mental illness in children with autism, anxiety disorders and learning disorders.

Mimi and I remain steadfast in our worldwide commitment to empower over 1 million people around the world as Diamond Hearts, to share vision, hope, faith, courage, opportunity, success and providing resources for research; development, implementation and treatment for children with mental illness.

We have created a vision that we now continue to articulate with unmatched passion in ownership that we will relentlessly live for success and completion.
